

**NO ELECTRICITY**  
**NO WASTED REGENERANT**  
**NO WASTED WATER**  
**NO COMPARISON**

## **A Kinetico Water Softener is Unique.**

### **Non-Electric.**

A fully-automatic control valve measures water usage and initiates regeneration only when needed. Uses less regenerant and eliminates costly electronic repairs.

### **Twin Softening Tanks.**

Unlike single tank systems, a Kinetico system switches service from tank to tank for a continuous supply of soft water. The tank in service also cleans its twin with soft water.

| Features and Benefits   | Kinetico Water Softener | Single Tank Electric Timer Water Softener |
|---|-------------------------|---|
| Non-Electric  | Yes                     | No  |
| System design eliminates timer, solenoid and microprocessor problems  | Yes                     | No  |
| System has two softening tanks  | Yes                     | No  |
| Soft water is used to regenerate the softener during all phases of the regeneration process                 | Yes                     | No  |
| Soft water is available for use during regeneration   | Yes                     | No  |
| Control valve parts operate in clean, soft water  | Yes                     | No  |
| System provides an uninterrupted supply of soft water   | Yes                     | No  |
| No unnecessary reserve capacities are required to handle additional demand for soft water                   | Yes                     | No  |
| No special cycles or by-pass adjustments are required when you have guests or before you leave for vacation | Yes                     | No  |
| System regenerates only when necessary based on water usage and not at a preset interval                    | Yes                     | No  |
